

SUJIT SWAIN

Backend Engineer | Java | Microservices | Data | Cloud | APIs

Bangalore, India

Email: sujitswain2023@gmail.com | **Phone:** +91 8925114798

LinkedIn: [linkedin.com/in/sujit-swain-tech](https://www.linkedin.com/in/sujit-swain-tech)

PROFESSIONAL SUMMARY

Accomplished Backend Engineer with 2+ years of expertise in architecting secure, high-performance APIs and microservices within AWS cloud ecosystems. Skilled in enhancing Developer Experience, leveraging T-shaped skills, and implementing robust, scalable solutions. Proven success in API performance tuning, cost optimization, and delivering customer-focused solutions. Proficient in industry-leading tools like Swagger, and advanced profiling techniques, as well as Agile tools such as Jira and Confluence for streamlined collaboration and transparency. Recognized for proactive ownership, innovative problem-solving, and elevating code quality, system resilience, and customer satisfaction.

TECHNICAL SKILLS

Programming Languages & Frameworks: Java (17+), Python, Spring Boot, Spring Security, Spring Batch, JavaScript, React

DevOps & Cloud: Jenkins, APIM, GitHub Actions, AWS (EC2, S3, Lambda), Docker

Documentation & Collaboration: Swagger, Postman, Confluence, Jira (Agile)

Databases: MySQL, Redis, JPA

Monitoring & Testing: JUnit, Mockito, AWS CloudWatch, Kibana

Version Control & Build Tools: Git, Maven, Gradle

Messaging & Integration: Apache Kafka, Azure Service Bus

WORK EXPERIENCE

Software Engineer | Capgemini, Bangalore | Jan 2024 - Present

Client: Goldman Sachs (via Capgemini)

- Developed and maintained RESTful APIs using Java 17 and Spring Boot for billing and data processing workflows within a microservices-based application.
- Optimized large-volume CSV processing using **multithreading**, reducing processing time from approximately 10 minutes to 1.20 minutes, an **88% improvement**, for datasets containing **10K-50K records**.
- Developed and executed Python scripts for API performance testing, analyzed processing behavior, and optimized backend response times.

- Developed **Spring Batch jobs** for processing failed records and generating CSV reports with scheduled daily execution.
- Integrated **AWS S3** for file storage and **AWS CloudWatch** for application monitoring and troubleshooting.
- Implemented global exception handling and configured **MDC** with a **TaskDecorator** to propagate request IDs, enabling clear and consistent log tracing across distributed services.

Client: Manulife

- Developed and maintained Spring Boot REST APIs supporting business workflows for a life insurance application.
- Integrated **Azure Service Bus** for asynchronous communication in **PDF generation workflows**.
- Implemented PDF document generation using **FreeMarker templates** and **PDF AcroForm** fields, mapping application data to templates and predefined form fields.
- Investigated application issues through log analysis and request tracing, then implemented fixes followed by functional and regression testing.
- Ensured code quality and security with SonarQube, reducing vulnerabilities by 50%.
- Actively participated in **peer reviews** and **discussions**, helping reduce technical debt and improve delivery quality.

PROJECTS

Order Processing System - Event-Driven Microservices

[GitHub](#)

Java, Spring Boot, Apache Kafka, MySQL, AWS S3, Stripe

- Designed an event-driven microservices platform with independent Order, Payment, Inventory, Notification, and PDF services using Spring Boot and Apache Kafka.
- Implemented idempotent event processing, payment webhook handling, optimistic locking for inventory reservation, Stripe payments, and AWS S3 invoice/PDF storage.

Distributed API Gateway & Rate Limiter

Java, Spring Boot, Redis, Docker

- Designed an API Gateway with distributed Token Bucket rate limiting and configurable tier-based request limits.
- Used Redis as shared state and Redis Pub/Sub to propagate rate-limit policy changes across gateway instances without restarts.

Notes Application

[GitHub](#)

Java, Spring Boot, React, MySQL, JPA, JWT

- Built a full-stack note-taking application with Spring Boot REST APIs, React, MySQL, and JPA.
- Implemented JWT authentication and authorization, validation, exception handling, user-specific resources, and CRUD operations.

CERTIFICATIONS

[AWS Certified Cloud Practitioner - CLF-C02 | 2026](#)

EDUCATION

Bachelor of Technology in Information Technology

Puducherry Technological University | CGPA: 9.33

August 2019 - May 2023

LANGUAGES

English, Tamil, Odia, Hindi

PROFESSIONAL QUALITIES

Team Collaboration, Ownership, Adaptability
